Native. Wild. Forever.

organised by

SRI GURU GOBIND SINGH COLLEGE

Sector 26, Chandigarh

*Kabirā aisā bij boi bārah mās phlant,
sītal chhāya gehar phal pankhi kel karant.*

- Sow the seeds of the such a plant which shall bear fruit twelve months a year, with cooling shade and abundant fruit, upon which birds joyously play,

Bani Bihagot Kabir Ji, Sri Guru Granth Sahib Ang, 3376.

Sri Guru Gobind Singh College, Sec-26, Chandigarh is initiating a novel idea of creating a mini-forest on-campus with an objective to promote sustainable environment. This habitation will be a natural air-purifying dense forest with multiple native species of trees. It will help in creating 30 times more oxygen than regular plantation and will be a hub of natural biodiversity. This unique technique of planting has been derived from Japanese Miyawaki technique which stresses on natural restoration of land using native plant species.

An interactive Workshop will be conducted by EcoSikh an organisation committed to the cause of promoting environmental awareness in consonance with Guru Nanak Devji's ideology to live in harmony with the environment. The Workshop will sensitise the youth about the importance of ecology and its relevance today through the initiative of planting native species of trees.

This three day Workshop from April 1-3, 2019 will include forest plantation activity along with classroom sessions and on-site training by technical experts. The participants will learn the technique with hands-on experience. This project will provide a unique opportunity to the staff and students to learn the technique and become environment leaders and will further help in decreasing the institution's carbon footprint.

*Special Feature of the Workshop : Meditation Camp in the
lap of nature in Nepli Forest Reserve, Chandigarh*
